Summary:

Full-stack web developer with 2.5 years of experience in designing and delivering high-quality web applications and services. Led both frontend and backend teams, managed server infrastructure, and oversaw complete project lifecycles. Successfully built and launched a SaaS product, two large-scale live projects, and developed 20+ tools for the creators. Focused on creating scalable solutions and fostering collaboration for impactful results.

Experience:

Software Engineer - *OcotopusX*   Apr 2023 - May 2025 | Chittagong, Bangladesh

- Built and maintained backend systems and project architecture using a monorepo setup for multiple applications.
- Led frontend and backend teams, distributed tasks, reviewed code, and made key technical decisions to project success.
- Designed ERD diagrams, planned activity flows, and created scalable database schemas for performance and reliability.
- Managed 20+ projects in a single codebase, ensuring smooth collaboration and consistent development practices.
- Set up and maintained servers, handled deployment, uptime monitoring, and ensured secure application performance.
- Delivered a SaaS product, launched 2 live projects, and built 20+ tools for content creators.

Full Stack Developer - *Monster Studio*   Jan 2023 - Apr 2023

- Managed MongoDB indexing, search, filter, and pagination using Atlas Search, and optimized database structure.
- Integrated services like Cloudflare R2, Mixpanel, Mailgun, Stripe, and PayPal, as well as added real-time notifications.
- Built bulk file/video upload & download features, responsive dashboards, and tracked analytics.

Technical Skills:

Programming Language: C, C++, JavaScript, TypeScript

Frontend: React JS, Remix Js, Next Js, Redux Js, Zustand, Tailwind CSS, Bootstrap, Firebase, Stripe, Material Ui, Shadcn

Backend: Node JS, Express JS, Nest JS, JWT, Redis, MicroService, Zod, Paddle, Stripe, Github Action, Ngnix, Contabo Server

Database: MongoDB, Mongoose (ODM), PostgreSQL, Prisma (ORM)

Personal Project:

Doctor Service & Blood Donation App   **Live Link** | **Github Client** | **Github Backend**

Overview: A healthcare platform enabling doctor appointment booking, blood donor requests, and live consultations via Google Meet.

- Smart booking system. Users can easily book appointments and trucks on the dashboard.
- Users can request blood donors and leave reviews post-donation.
- Real-time doctor availability with live video calls and prescription sharing.

Technology Use: TypeScript, Express JS, Next JS, Redux, Prisma, PostgreSQL, JWT, Stripe, tailwind, Material UI

Certifications & Training:

Complete Web Development Course - ***Programming Hero***   Jan 2022 - Aug 2022 **Certificate**
Next Level Web Development Course - ***Programming Hero***   Feb 2023 - Oct 2023 **Certificate**
DevOps Career Path - ***Interactive Care***   Oct 2024 - May 2025

Education:

Bachelor Of Business Studies (BBS)
Notional University - Gazipur, Bangladesh
Jan 2021 - Jan 2025
